Bachelors in Software Engineering  
CGPA 3.60

### **3. Intermediate**

NCR-CET College  
Pre-Engineering  
A1 Grade 84%

### **4. Matriculation**

Ghulaman-e-Abbas School  
Computer Science  
A1 Grade 89%

### **5. Certifications**

C# CERTIFIED from APTECH

CompTIA Linux+ from NED University of Eng. & Tech.

## Projects

### **CloudSOC (Security Operation Center) - AUDIT**

**(Senior Software Quality Assurance Engineer)**

Audit is an app of Elastic's CloudSOC solution which allows customers to unveil the shadow IT. The logs that are generated by different appliances (Firewalls) are given as input to app Audit. It takes firewall logs as input and processes the huge amount of Big data, it audits the customers logs and presents them in a meaningful way which gives information regarding.

- 1) How many services are being used in the enterprise?
- 2) How many users are using those services?
- 3) The data is coming from which region.
- 4) Groups and categorizes the services according to their risk

Elastic's AUDIT app uncovers Shadow IT and assigns Business Readiness Rating™ to cloud apps. It enables IT pros to adopt and consolidate productive cloud apps and control risky ones, with decisions backed by insightful analytics. Audit identifies all the Cloud apps used by an organization, it finds business readiness rating based on 60+ metrics; it also compares and contrasts with similar apps. It gives a summary report card for your organization with regards to cloud app security. Within seconds, all SaaS apps used across the company, apps that pose a medium or high risk, and top 5 riskiest apps, users and location of these apps. A company Audit Score gives you a top level view of your organization's risk profile. It finds and monitors all cloud applications used in an organization and highlight any risk and compliance issues these may pose.
